WARRANTY**Product Description:****Part Number:****EAN Code:****Package Size:****Energy 8^{plus} UK****5207442/UK****4013674744251****4 Pcs****Product Features:**

Battery charging and maintenance unit for 1 - 6 AAA or AA cells, 1 - 4 C or D cells and 1 - 2pcs 9V Blocks. This charger is suitable for NiCd and NiMH rechargeable batteries.

The charging currents are: 1000mA for AA, C and D cells, 400mA for AAA cells and 60mA for 9V Blocks.

There is a capacity test of the inserted cells for approximately 5 seconds, an automatic diagnosis of the inserted cells with an automatic start of the refreshing process and/or pre-charging process, if required.

The Energy 8^{plus} has microprocessor controlled charging, five-way over charging protection, individual supervision of each cell position, faulty cell detection, alkaline battery detection and trickle charge. The charger is powered by a switch mode power supply which means it can be used worldwide (100-240V wide range input).

ANSMANN gives a guarantee of 3 years for the Energy 8^{plus} charger.
